***Allowable Subject Matter***

Claims 1, 3 and 5-10 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art fails to show or fairly suggest the electrode placement claimed in the mems device of the invention whereby a piezoelectric bending element is activated such that the piezoelectric material itself contacts an electrode on a substrate as opposed to the electrode of the piezoelectric element contacting the electrode on the substrate.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
